

## C 语言关键字 32

### 1. 数据类型关键字

#### A. 基本数据类型 (5 个)

void, char, int, float, double

#### B. 类型修饰关键字 (4 个)

short, long, signed, unsigned

*{ five[**float int void enum**] long **discus [double int short char unsigned signed]** } 5 个长铁饼*

#### C. 复杂类型关键字 (5 个)

struct, union, enum, typedef, sizeof

*{ union **sets [struct enum typedef sizeof]** } 同盟集合*

#### D. 存储级别关键字 (6 个)

auto, register, static, extern, const, volatile

*{ carves [**const auto register volatile extern static**] } 雕刻*

### 2. 流程控制关键字

#### A. 跳转结构 (4 个)

return, continue, break, goto *4 跳*

#### B. 分支结构 (5 个)

if, else, switch, case, default

*{ side[**switch if default else**] case } 边界条件*

#### C. 循环结构 (3 个)

for, do, while *3 循环*

## C++ 关键字 63

### 1. 新增 4 种类型 15 个关键字

bool, true, false;

class, private, protect, public, friend, this, operator, virtual;

template, typename, typeid;

wchar\_t;

*bool, class, top3[this operator private, protect, public friend] virtual friend, 3t[template, typename, typeid], wchar\_t 4 种类型, 3 个最假的朋友*

### 2. 数据类型转换 4

const\_cast, dynamic\_cast, static\_cast, reinterpret\_cast

### 3. 异常处理 3

try, catch, throw

### 4. 其它 9

new, delete, explicit, mutable, inline, export, using, namespace, asm

*unnamed [using namespace new asm mutable explicit delete] 4ticket [try inline catch 4-cast export throw] 无名的四张票*

## Python 关键字 31

### 1. 判断、循环 12

if elif else for while break continue and or is not in *wife [while if for else elif] and bionic [break is or not in continue] 老婆和仿生学*

### 2. 函数、模块、类 8

from import as def pass lambda return class

*return from placid [pass lambda as class import def] 从温和的地方回来*

### 3. 异常 4

try except finally raise

*fret [finally raise except try] 发愁*

### 4. 其他 7

print del global with assert yield exec

*yield waged [with assert global exec del] print 放弃带工资的打印*

## Shell 编程关键字

### 1. 命令

exit break continue trap read test

*brett[break read exit test trap] continue 布雷特, 继续!*

### 2. 控制流

for while until if else then case do done xargs

*wife[while if for else] then cud2x[case until do done xargs] 老婆吐了两个 X*

### 3. 各种测试

string test

logical test

argument

numeric test

file test

*slant-f 做 F 状倾斜*
